## DETAIL OF THE OUTPUT-Q7

Output id.	Output Title	Output/Activity description	Output leader	Media (s)	Language	Start-End date
Q7	Dissemination of project results	<p>Dissemination activities are so eligible for the project process.</p> <p>We will start to dissemination introducing the project on newspaper , local newspaper and journals.</p> <p>We will produce project leaflets , paper brochures and booklets . We will LPN web site. We will uplod the dissemination materials on project web site.</p>		<p>Book, Exhibition, Social Media, Publications, Oral</p>	EN,TR,PL,ES, RO,IT,PT	01.09.2014-31.08.2016
Q7A1	general dissemination activities	“.....” same	ARID Lacjum , PL			01.09.2014-31.08.2016

Q7A2	Press conferences	We will set up three press conferences to introduce results of the project. Each partner will set up three conferences in their country. Each partner will be responsible for this activity.	ACTA Central, RO			01.04.2015-15.08.2016
Q7A3	Project documentary	We will create project documentary. This documentary consist of all project activities .	YASAD, TR			01.05.2016-30.07.2016
Q7A4	Project short film	This film will be maximum 3 minutes. This film will be created by the professional staff. The film will be attractive and impressive .	YASAD, TR			01.05.2016-01.08.2016

## DISSEMINATION REPORT

# TABLE OF CONTENT:

1. Introduction
2. Target groups
3. Aims of WP Dissemination
4. Logo
5. Website
6. Information about LPN project on partners website.
7. National dissemination activities
8. Dissemination template
9. Social networks
10. Twitter
11. Facebook
12. Leaflet
13. Roll-up / banner and poster
14. Project presentation template
15. Articles in newspaper
16. Press conferences
17. Letterhead
18. Promotion tools
19. Communication
20. Conclusion

### **Dissemination plan was divided in three main parts:**

- INFORMATION (focused on the projects milestones: we started work, we finished work, we obtained the product), - I
- PROMOTION (focused on the content for specialists or persons directly working with the subject) – P
- DISSEMINATION activities if the final version of the products is ready and possible to disseminate. -D

### **Target group:**

- Peer cooperation with disable students of another country.
- Skilled project team members are as a multipliers.
- Social workers are deeper understanding of their profession and they was adopt innovative teaching methods is the first target group. These project team was selected from project partners. Furthermore we strengthen our international partnership. That was leaded to new cooperative international project work. The project was started by a long cooperation which lead to other project activities and parallel exchange of staff and teachers, social workers in this field.
- Special education teachers.
- Psychologists.

### **Aims of WP Dissemination**

Also the DISSEMINATION of results activities was presented throughout all the 3 project phases.

This activities aims to properly disseminated the results and processes of the project and achieve their sustainability in the long-term, which can only be achieved by starting dissemination procedures from the very beginning of the project.

Stakeholders was gradually involved throughout all phases and activities. As we are a European partnership, all the project activities was a mix of national implementation (each partner in own country) and European adaptation of results.

As the dissemination team shared the project website with the online training tool, they were in constant collaboration. The dissemination team had several pages of their one unrelated to the training materials. These pages was contain things such as partner information, project information, newsletters, progress reports and updates on new available materials, images, etc.

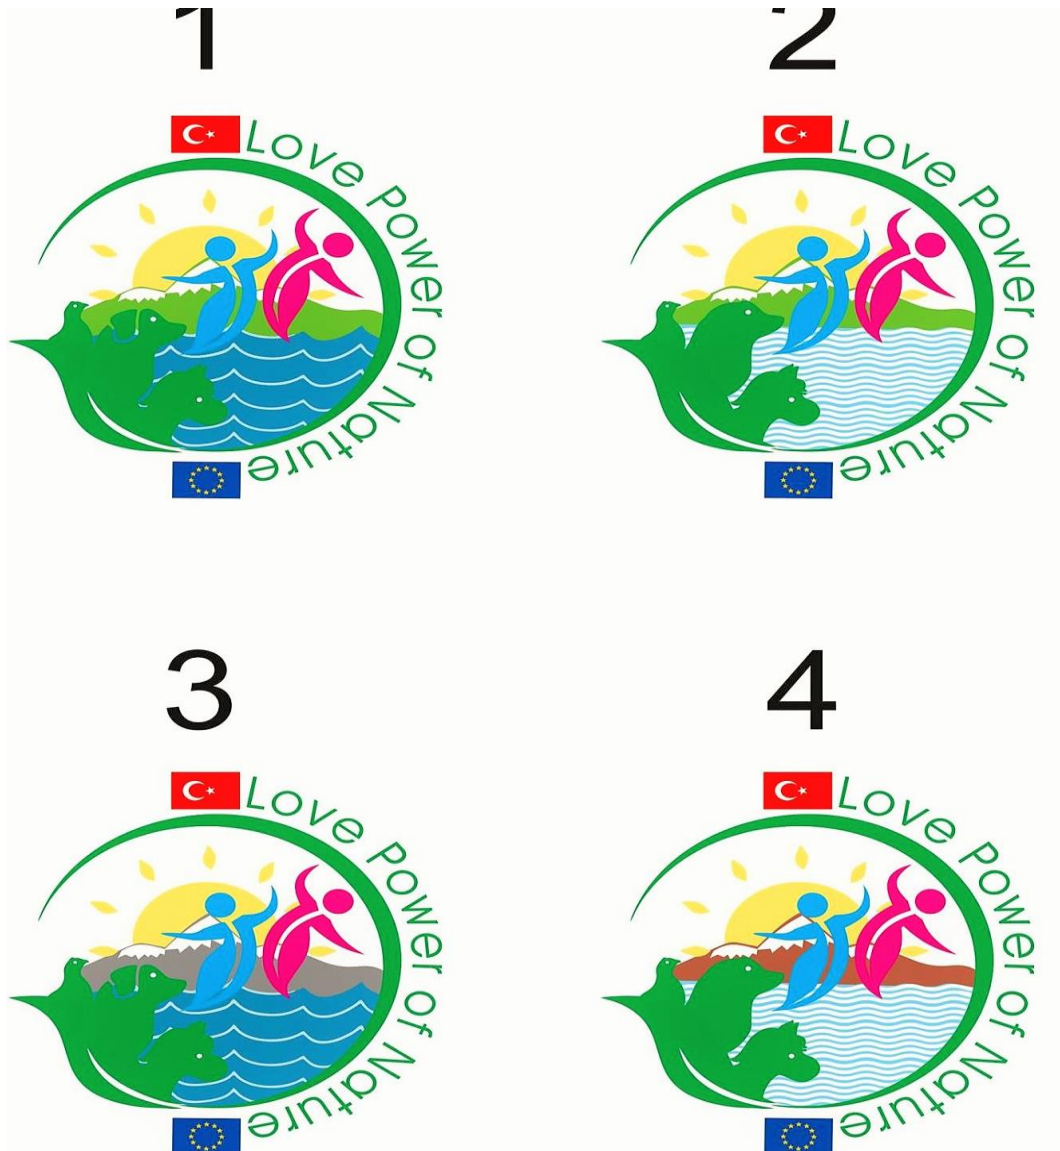

ARID LACJUM from Poland was responsible for collecting all project dissemination and results activities. The staff from the partner ARID LACJUM are professionals in the design of high quality websites, print and marketing products.

ARID LACJUM was developed the dissemination plan to monitor progress implementing the dissemination. The Love Power of Nature dissemination events which was organized in each partner country by each partner, was promoted and valorized the project outcomes and was offered the frame for further debates and reflections in this theme. ARID LACJUM was responsible of searching the best opportunities and means to promote the project, coordinating and monitoring all partners' dissemination activities.

Also the partners was disseminated the project with presentations, press releases, articles at press conferences related to lifelong learning, e-learning, and at focused on workshops for social workers and teachers.

**Logo – DONE:**

The design logo was chosen by voting. There was four logos. Logo no 1 was winner.

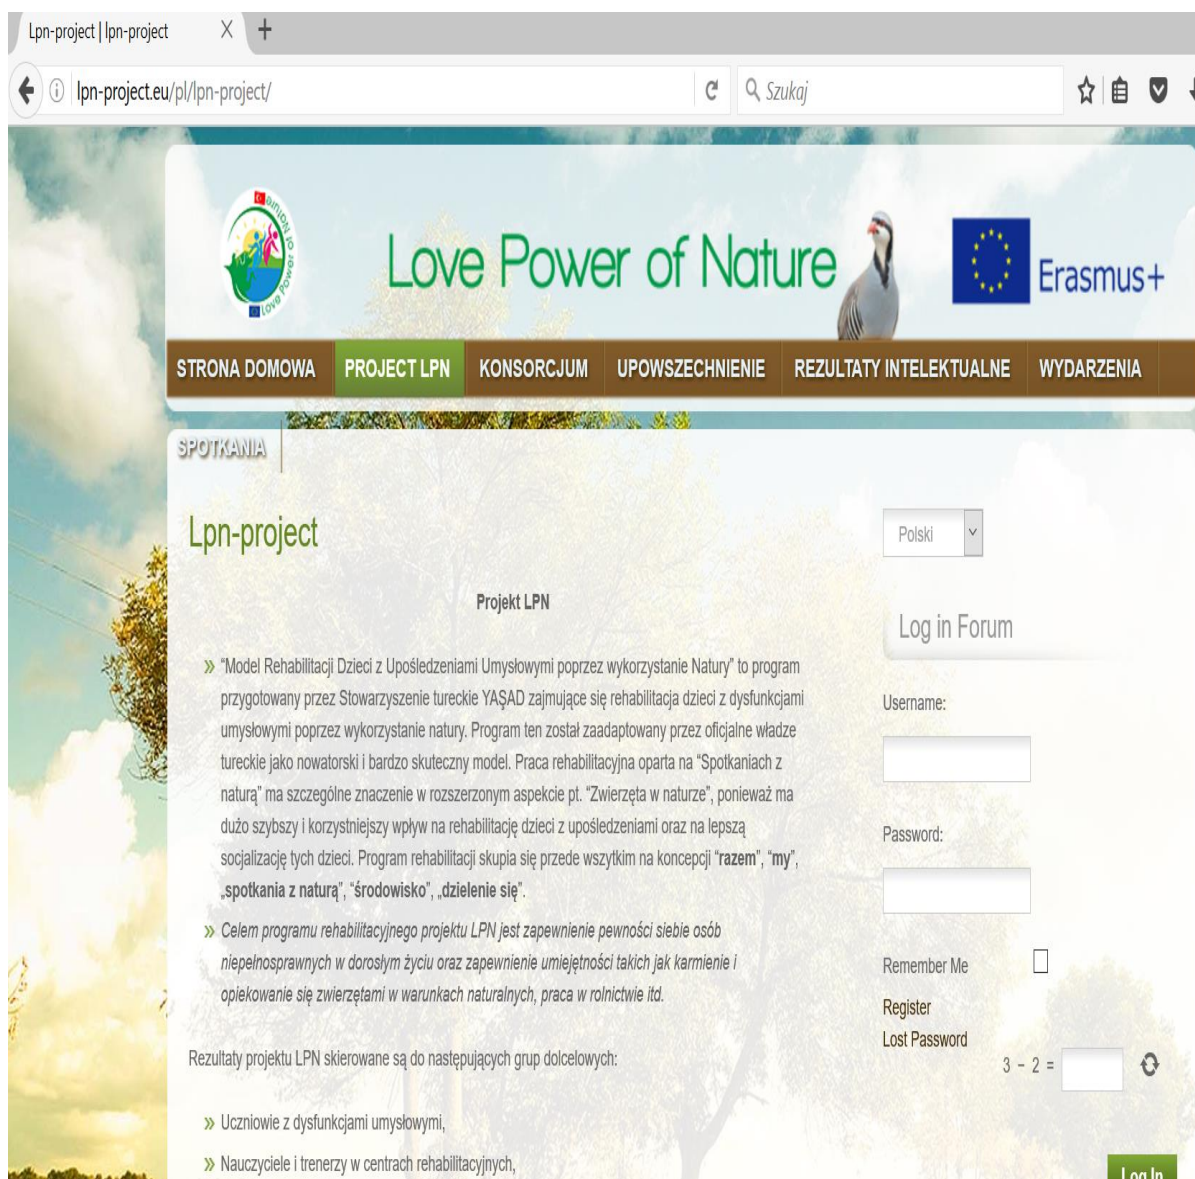

All partners was obligatory to used this logo on all they materials like: leaflets, promotion tools, articles in newspapers, posters or roll-up.

## INFORMATION ABOUT LPN PROJECT ON WEBPAGE.

Love Power of Nature web-page ([www.lpn-project.eu](http://www.lpn-project.eu)) was available in English and all project partner's languages. It was served to the dissemination of the project and all its results to a wide audience and virtual community of practice between target groups. It was also served to the internal communication between partners and project management tool (uploading and downloading project documents on the open area).

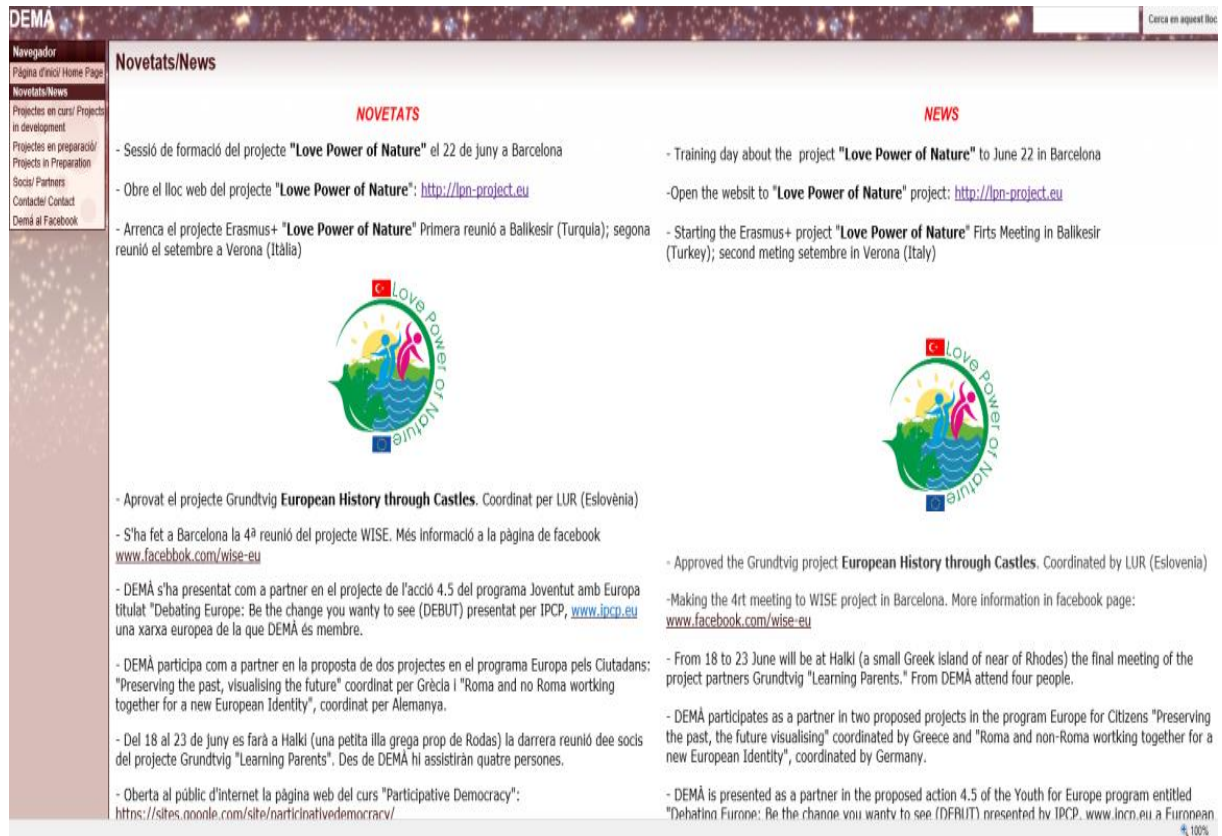

The screenshot shows the website [lpn-project.eu/pl/lpn-project/](http://lpn-project.eu/pl/lpn-project/). The page features a header with the project logo, the text "Love Power of Nature", and the Erasmus+ logo. A navigation menu includes: STRONA DOMOWA, PROJECT LPN, KONSORCJUM, UPOWSZECHNIENIE, REZULTATY INTELEKTUALNE, and WYDARZENIA. The main content area is titled "SPOTKANIA" and "Lpn-project". It contains a section for "Projekt LPN" with a dropdown menu set to "Polski". The text describes the project's goal: "Model Rehabilitacji Dzieci z Upośledzeniami Umysłowymi poprzez wykorzystanie Natury" (Model of Rehabilitation of Children with Intellectual Disabilities through the Use of Nature). It mentions that the program was developed by the Turkish Association YAŞAD and adapted by official authorities in Turkey. The program focuses on "Spotkaniach z naturą" (Meetings with Nature) and aims to ensure the safety of people with disabilities in adult life and provide skills like feeding and caring for animals in natural conditions. The results of the LPN project are directed towards two groups: students with intellectual disabilities and teachers/trainers in rehabilitation centers. A login form is visible on the right side of the page, including fields for Username, Password, Remember Me, Register, and Lost Password, along with a CAPTCHA.

## progetto LPN

» “Il modello riabilitativo in natura con bambini con disabilità mentali” suggerito da YAŞAD e adottato dall'ente turco di recupero sociale viene qui suggerito come un modello applicabile.. Nelle attività riabilitative basate sull'incontro con la natura si creano legami con gli animali e le creature della natura stessa, Lo scambio affettivo è un sostegno pensato per portare con più rapidità al risultato di reintrodurre i diversamente abili nella società. IL programma riabilitativo si focalizza su concetti dell'Insieme e del noi nell'incontro con la natura, l'abitat e la condivisione..

» *Il progetto riabilitativo ha lo scopo di accrescere l'autostima dei diversamente abili nel cominciare una vita indipendente e sviluppare delle abilità con il prendersi cura, nutrire delle specie animali nell'ambiente naturale, in attività agricole e creare consapevolezza nelle famiglie*

Il progetto LPN porterà a dei risultati che andranno incontro a dei bisogni reali dei suoi partecipanti:

- » Studenti con disabilità mentali,
- » le insegnanti in centri riabilitativi ,
- » Legislatori e gruppi svantaggiati
- » le Famiglie dei diversamente abili.

## National dissemination activities

All partners was responsible for dissemination activities and were manage disseminations all over the partner countries level and expected to be very important for the international connections of this partner.

Partners from each country participating in the LPN project was requested to organize a wide range of national dissemination activities especially targeted to social workers, teachers and other stakeholders institutions. The activities was tailored to the national context and include conferences, workshops, training events, briefings, meetings, press releases and email bulletins.

### List of national activities from all partners from 2015/2016.

<p>Introduction of the LPN to the students in Balıkesir</p> <p>BAU</p>	<p>We introduced the LPN Project to the students from Bandırma On Yedi Eylül University in Balıkesir in April. The ongoing projects and their websites were presented in the meetings.</p> <p>Data:</p> <p>18 people</p>	
<p>Introduce LPN Project-Meetings</p> <p>BAU</p>	<p>We introduced the project to the teachers-academics in Balıkesir. More than 100 people participated in the dissemination meetings</p> <p>Data:</p> <p>22 people</p>	
<p>Meetings with expert trainers in Balıkesir.</p> <p>BAU</p>	<p>We introduced the project and trainers platform on website to the expert trainers and teachers in Balıkesir on May 02, 2016 in Balıkesir. More than 100 people participated in the dissemination meetings. The meetings were organized by the collaboration of YASAD and Balıkesir Educational Directorate.</p> <p>31 people</p>	

<p>Training workshop GEOCLUBE</p>	<p>A Training session on the Erasmus+ Programme and on the LPN project (presentation of the project: aims; partners; methodology:</p> <p>”Mudar vidas, abrir horizontes”/”Changing lifes, expanding horizons”.</p> <p>We organized this training session in a vocational training center – CINDOR – Centro de Formação Profissional da Indústria da Ourivesaria e Relojoaria in Gondomar with an audience made up of senior students, teachers and school staff.</p> <p>Link: <a href="http://www.cindor.net/">http://www.cindor.net/</a></p> <p>Data: 06/06/2015</p> <p>-2 classes composed by 40 senior students;</p> <p>-Trainers (2)</p> <p>-School staff (2)</p> <p>-Geoclube staff (4)</p>	
---------------------------------------	--	--

<p>Meeting GEOCLUBE</p>	<p>A Meeting session on the Love Power of Nature project. We meet with a local NGO – Associação Recreativa Social e Cultural de Silveirinhos (ARCSS), in Gondomar in their headquarters to present the aim, goals, objectives, partners and description on the LPN project. We visited their instalations and we got to know better their projects concerning mental disabilities. During the session we showed a powerpoint written in Portuguese that includes a short project presentation; some vídeos and photos about the LPN and the first meeting of the project that took place in Balikesir, Turkey. The audience was composed by the NGO staff and some trainers. The participants were very interested in the project methodology. They showed real interest in becoming partners and involved in the future, in a next project meeting. They were surprised to see amount of effort carried out by Yasad organisation in the mental disabilities field and pleased to see this kind of european partnerships. During the session we mentioned similar</p>	
-----------------------------	--	--

	<p>initiatives and outdoor activities elsewhere and in their own NGO working with animals: horses, dogs and contacting with Nature through campings and hikings. We also distributed flyers written in Portuguese with project information and a translated document (Portuguese) of the rehabilitation model proposed by Yasad turkish organization, promoter of this project.</p> <p>Link: <a href="http://www.arcss.org/">http://www.arcss.org/</a></p> <p>Data: 06/07/2015</p> <ul style="list-style-type: none"> <li>- ARCSS NGO Staff (5)</li> <li>- Trainers (2)</li> <li>- Geoclube staff (2)</li> </ul>	
<p>Training activity GEOCLUBE</p>	<p>The piloting session has been executed in Gondomar, Porto at 14.11.2015 at a rural vacation retreat called “Casa de São Miguel”, owned by a local teacher. The activity consisted in celebrating St. Martin’s Day with a traditional “Magusto”. St. Martin’s Day is marked with a popular festival called “Magusto” and many stalls of snacks and baked nuts with several typical</p>	

beverages. The “Magusto” is a popular festival, whose forms of celebration differ slightly depending on regional traditions. Groups of friends and families come together around a bonfire where they roast chestnuts or acorns to eat. They drink “jeropiga”, “água-pé” or “vinho novo”; play traditional games (jogo da malha, corrida de sacos, saltar à corda, cabra cega); play and get dirty with the ashes from the fire pit and sing songs. The piloting session was prepared for professionals and stakeholders in LPN topic from Gondomar area. The rehabilitation via Nature is quite well developed in Gondomar town but still needs development and general support. The piloting session gathered about 15 youngsters (2 handicapped) and 10 adults (teachers, tutors, coordinators). During this session there was executed direct testing of the rehabilitation model in practice. The activities executed during this event were based on the different kind of Portuguese traditional games (has mentioned before) and also direct contact with Nature.

	<p>Data: 14/11/2015</p> <p>-15 youngsters (2 handicapped);</p> <p>-10 adults (teachers, tutors, coordinators).</p>	
<p>Project «Symbiosis»: activity project GEOCLUBE</p>	<p>Project developed by local NGO – Associação Recreativa Social e Cultural de Silveirinhos (ARCSS), in Gondomar in their headquarters with the assistance of Geoclube. Symbiosis is close and often long-term interaction between two different biological species. The main goal of this experimental activity is on Music therapy. The idea is to use Music and sounds to promote communication, relationship, mobility, expression and self-learning. Relevant therapeutic objectives in order to meet the physical, emotional, mental, social and cognitive patient. Music therapy seeks to develop potential and / or restore functions of the individual so that he or she achieves a better quality of life through prevention, rehabilitation or treatment of diseases. In a next phase we will work with specific categories on LPN project, such as: sounds of nature; animal sounds. The piloting session gathered</p>	

	<p>about 10 handicapped users (adults) and 5 adults (1 teacher, 2 trainers, and 2 coordinators). During this session were taken several pictures (attached to this report).</p> <p>Data: 22/03/2016</p>	
Project meeting	<p>Meeting with the project staffs and the project target groups.</p> <p>Data: February – April 2016</p> <p>People: 10</p>	
Training activity	<p>Meeting with the students target group.</p> <p>Data: April-May 2016</p> <p>People: 20</p>

## Social Networks

### Twitter

Online social networks was another potentially useful dissemination tool and channel. The LPN consortium was believed this is a good means of outreach to the public. LPN results was disseminated through popular social networks such as LinkedIn and Twitter. The project was taken advantage of the well-established social media channels of partners. Twitter was a particularly useful way at engaging participants at events and in increasing the impact and visibility of such events. LPN workshops and events was their own Twitter hash tags. A twitter account was registered, as:

<https://twitter.com/LovePowerNature>

## Facebook webpage

Facebook offers us - Internet users - a very simple method to promote various projects - fan page,. With their help we was promoted the project results and products of our Love Power of Nature project. The project was established an account on the Facebook. Buttons and links to the LPN facebook profile was posted on the home page of the project and all partners was posted the link or button to facebook profile on own website.

<https://www.facebook.com/groups/568504893246217/>

The screenshot shows the Facebook group page for "Love power of nature ( erasmus + ka2 -transfer of it)". The page features a cover image with the LPN logo and a post by Özgür Aycil from May 6, 2015, at 13:36. The post includes a flyer for the "Love Power of Nature" project, which is a rehabilitation program for people with disabilities. The flyer lists partners such as Erasmus+, the Turkish Ministry of National Education, and various NGOs. The Facebook interface shows 312 members and options to join the group, post, and create new groups.

In the public area of the portal was provided all information on LPN project, under News and a Forum with a Facebook and Twitter social network entitled. Test teaching materials was also published on the portal, interactive for long distance learning, available online for self-evaluation tests. The definitive teaching materials was made available in electronic format by the partners in own languages (Turkish, Polish, Romanian, Italian, Portugal and Spanish) and in English.

### Leaflet/brochure/booklet

A leaflet and brochure or booklet on Love Power of Nature partnership, objectives and training products was made available in all partners' languages. Those leaflets were distributed during the press conferences, events devoted to the relevant topics, during branch fairs, workshops etc. In addition the leaflet was sent to target groups of the dissemination (indicated at the beginning of this document). That was done at the beginning of the project. Number of copies foreseen if applicable **1 500**. Consortium partners distributed 2350 p. of leaflets, brochures and booklets.

### El projecte

- El programa de rehabilitació del projecte “*Love Power of Nature*” (LPN) remarca els conceptes de “*junts*”, “*nosaltres*”, “*trobada amb la naturalesa*”, “*hàbita*”, “*compartir*”.
- Situem els infants en l'hàbitat dels animals, associant a la seva vida diària; proporcionant als nens passar un dia feliç aprofitant l'educació participativa en la naturalesa i el medi ambient natural.
- El Programa de Rehabilitació en la naturalesa del projecte LPN té com a objectiu guanyar més autoconfiança de persones discapacitades amb habilitats per a la vida independent, mitjançant l'alimentació i la cura d'espècies animals en ambients naturals, les activitats agrícoles i també la creació de consciència en les seves famílies.
- Els problemes primaris d'infants amb discapacitat mental es basen en la societat, la comunicació i la falta d'amor.
- Els infants amb discapacitats mentals poden desenvolupar les seves habilitats motores independents i la confiança en si mateixos i això és possible amb especials activitats de rehabilitació.
- En el cas que les necessàries activitats de rehabilitació no es poguessin fer, les persones d'aquests grups podrien esdevenir simples consumidors i ser dependents en la seva vida.
- Tot i que ha recentment hagut una evolució positiva sobre les persones amb discapacitat a Europa i Turquia, com ara les cures a la llar, són necessaris models de rehabilitació per a la rehabilitació en els habitatges i les ciutats
- Els elements més comuns dels models de rehabilitació es realitzen a les cases i al centre de les ciutats.
- El “Model de Rehabilitació en la naturalesa dels nens amb discapacitat mental” que YAŞAD desenvolupa i l'adopció del Programa de Recuperació Social apareix com un model reformista i aplicable.
- Amb activitats de rehabilitació basades en la “*reunió amb la natura*”, la creació d'empatia amb “*criatures i animals en la naturalesa*”, “*intercanvi de suport amorós*”, es considera que s'aconsegueix un resultat més ràpid per facilitar la reintroducció d'infants amb discapacitats en la societat

Catalan Version to rehabilitation model. Distributed 750 copies,

FROM DEMA:

Este es el módulo de proceso de rehabilitación y el estudio de caso que se utilizará en la formación práctica (entrenamiento en el trabajo) en el ámbito de la "rehabilitación de las personas con discapacidad mental en la naturaleza y los entornos naturales" según el plan de trabajo de YAŞAD...

El modelo de rehabilitación que sugerimos en nuestro proyecto se aplicará de acuerdo con el estudio de caso y el plan de trabajo se desarrolla a continuación.

**La implementación del modelo de rehabilitación.**

La contribución la familia y de los centros de rehabilitación, así como de las organizaciones no gubernamentales durante la implementación del modelo es muy importante para su desarrollo.

**A continuación explicamos un estudio de caso;**

Ahmet es discapacitado mental desde el nacimiento y se diagnostica como un retardo mental educable. Hasta su octavo año, ha estado en comunicación dentro de la casa con su madre, padre y hermano y se ha mantenido lejos del entorno social de la familia. Más tarde, con la orientación del medio ambiente y las nuevas regulaciones legales, la familia ha matriculado Ahmet en el centro de rehabilitación especial. Ahmet sigue en este centro de rehabilitación desde hace 5 años. Por las clases diarias de educación especial, ha habido una mejora en la capacidad de movimiento independiente de Ahmet. Por ejemplo, se descubrió su interés por la música. Se convirtió en un chico psicológicamente más extravertido, que trata de hablar, de expresarse. Sin

## FROM YASAD:

**DOĞANIN SEVGİ GÜCÜ**  
**Love Power of Nature**

Proje Referans No: 2014-1TR 01-KA204-013064

Avrupa Birliği Erasmus KA2 Stratejik Ortaklıklar kapsamında engelliler alanında Balıkesir'den Avrupa'ya rehabilitasyon modeli transferinin yaşanacağı "Doğanın Sevgi Gücü- Love Power Of Nature" başlıklı projemizin açılış toplantısına katılımınız bizleri onurlandıracaktır.

**Hakkı Kurtuluş DEMİR**  
YASAD Başkanı

Yer : Güney Marmara Kalkınma Ajansı Toplantı Salonu  
Tarih : 10.04.2015 Cuma  
Saat : 10:00 - 11:30  
Proje açılış toplantısı programı:  
-Projenin tanıtım sunumu  
-Protokol konuşmaları  
-Avrupa'dan gelen katılımcıların ülke ve kurum tanıtımları (İtalya, İspanya, Polonya, Portekiz, Romanya)  
-Çay, kahve ikram

sosyal çevresi, sokak, canlılar ile daha çok iletişim kurmak istese de ailesi ve rehabilitasyon kurumu tarafından bu isteği engellenmektedir. Bu durum da Ahmet'i saldırgan ve asabi yapmıştır.

Psiko- sosyal durumu belirtilen Ahmet'in, rehabilitasyon uygulamaları sürecindeki döngüde artık bir bakanına yaşanmaktadır. Ahmet artık 14 yaşına gelmiş, ergenlik sürecine giren bir bireydir ve sunulan rehabilitasyon süreci ona yetmemekte ve rahatsız etmektedir. Onun artık psikolojik olarak rahatlayacağı, enerjisini dışa vuracağı, sevgi alverişinde bulunacağı araçlara ihtiyacı vardır. Servis aracı ile evden alınıp rehabilitasyon merkezine giderken gördüğü dünyayı tanımak istemekte, hoş geldin-güle güle-nasılın v.b iletişim şekli, ev ve rehabilitasyondaki dünya ona yetmemektedir.

İşte bu noktada Ahmet'in doğada ve doğal ortamlar ile buluşması rehabilitasyon sürecini hızlandıracak, psiko sosyal gelişiminde olumlu gelişmeler sağlayacaktır. Hayvanları, çiçekleri, dereleri, bitkileri, ağaçları tanıması, onlarla sıcak bağlar geliştirmesi onda psikolojik terapi yaratacaktır.

**Doğada ve doğal ortamlarda rehabilitasyon programı örnek günlük yaşam planı:**

Bu program akşimsiz sınıf veya laboratuvar ortamlarında uygulamaya dayalı hazırlanan program olmayıp Projenin formatına uygun olarak doğa ve doğal ortamlarda yaşamın akışına uygun yöntemlerle davranış değişikliği yaratma esasına dayalı bir programdır. Mesleki yaklaşımlarla hazırlanan bu program gözlenebilir ölçülebilir bir programdır. Etkinliklerin her aşamasına çocuklar performans düzeyleri göz önünde bulundurularak dahil edilecek, uygulama sosyal hizmet ve özel eğitim teknik ve yöntemleriyle desteklenecektir. Zihinsel engelli çocuklar için uygulanabilir olan bu program çocukların psiko-sosyal durumlarına yaş durumuna göre grup oluşturularak uygulanacaktır.

## FROM ARID LACJUM:

Motto: „Lekarz leczy, natura uzdrawia” Hipokrates

Proces rehabilitacji oraz przedstawiony moduł praktyczny, zostaną wykorzystane w prowadzeniu szkoleń (szkolenia w miejscu pracy) w zakresie "rehabilitacji osób niepełnosprawnych poprzez zastosowanie kontaktu z przyrodą i środowiskiem naturalnym" - plan pracy według YAŞAD.

Modele rehabilitacji, który proponujemy w czasie trwania naszego Projektu będzie stosowany zgodnie ze studium przypadku i planem pracy zwanym poniżej.

### Wdrożenie modelu rehabilitacji:

Twierdzenia, że: „przyroda bez człowieka może istnieć ale człowiek bez przyrody – nie” tylko pozornie jest sloganem.

Osoby z niepełnosprawnością intelektualną w większości przebywają w Domach Pomocy Społecznej - jest to kosztowna forma pomocy. Nieliczni mają możliwość zamieszkania z rodziną. Stworzenie mieszkań treningowych, w których niepełnosprawni uczyliby się samodzielnego funkcjonowania, a później zyliby w mieszkaniach chronionych, daje same korzyści – od wzrostu samodzielności, samostanowienia, autonomii po korzyści ekonomiczne – niepełnosprawni przestają być tylko „biorcą” pomocy społecznej, lecz wnoszą swój wkład w życie społeczne.

Po pierwsze należy przyjąć, że dziecko żyje i funkcjonuje w środowisku naturalnym (przyrodniczym), jest jego częścią, bez względu na to na ile jego stan świadomości i doświadczenie pozwalają mu sobie to umysłować.

Po wtóre środowisko naturalne (przyrodnicze) stanowi dla niego przedmiot naturalnego poznania i przedmiot poznania w edukacji. Zjawiska przyrodnicze, geograficzne, atmosferyczne, fizyczne, cykle biosfery (i inne) są przedmiotem – chęcią poznania, dociekliwości, wyjaśnienia, a także składają się na treści przeznaczone dla poszczególnych etapów kształcenia.

1

Następna bardzo ważną płaszczyzną oddziaływania środowiska na dziecko niepełnosprawna, a właściwie jego zasobów jest relacja terapeutyczna i stymulująca. Czysty klimat, zdrowa żywność i piękno przyrody, właściwości klimatyczne mogą wspomagać proces terapeutyczny na poziomie psychicznym i fizycznym. Natomiast celowe, sprawdzone i świadomie stosowane zasoby środowiska, wybrane przez lekarzy oraz pedagogów, terapeutów przybierać mogą postać pomocy dydaktycznych lub systemowo opracowanych metod terapii np. animoterapia. Bardzo duże znaczenie ma tutaj wiedza i twórcza postawa profesjonalistów i rodziców pracujących z dzieckiem, którzy nie tyle są otwarci na alternatywne metody, co poszukują inspiracji w innych dziedzinach wiedzy. Kolejne dziecko może nie tylko czerpać korzyści z obcowania z przyrodą, z właściwościami leczniczymi i rehabilitacyjnymi jej zasobów, ale także kształtować postawę proekologiczną i samo oddziaływać na otaczający świat w praktyce i pracy.

W literaturze przedmiotu metody, które najczęściej są opisywane, a także inspirowane środowiskiem naturalnym i wykorzystywane w praktyce to między innymi:

- **animoterapia** – terapia z udziałem zwierząt (oswojonych i specjalnie treshowanych);
  - ✓ **Aktywne spotkanie z udziałem zwierząt** – opiera się na swobodnej spontanicznej zabawie, na oswojeniu w kontakcie ze zwierzęciem, na wywołaniu pozytywnych emocji a docelowo poprawieniu jakości życia;
  - ✓ **Terapia z udziałem zwierząt** – musi mieć ściśle wyznaczone cele terapeutyczne przez specjalistę oraz ustalony przebieg, w pracy z dzieckiem jest dostosowywana indywidualnie w zależności od rodzaju zaburzeń czy dysfunkcji;
  - ✓ **Edukacja z udziałem zwierząt** – jej głównym zadaniem jest stymulacja procesów poznawczych dziecka, na różnym poziomie w zależności od potrzeb.

### Hipoterapia stosowana jest najczęściej w:

- mózgowym porażeniu dziecięcym, stwardnieniu rozsianym,
- amputacjach i urazach,
- lżejszych wadach postawy,
- upośledzeniu umysłowym i zespołе Downa,
- autyzmie,
- zaburzeniach emocjonalnych i chorobach psychicznych,
- uzależnieniach i innych formach niedostosowania społecznego.

- **estetoterapia** – terapia poprzez kontakt z pięknem, czyli poprzez aranżowanie takiego doświadczenia terapeutycznego, podczas którego dziecko odczuwać doznania estetyczne, nawet jeśli nie będzie mogło ich werbalizować i komunikować;

- **hortikuloterapia** (z łac. hortus -ogród) – terapia oparta na doświadczeniu przebywania w ogrodzie oraz poprzez możliwość wykonywania w nim różnorodnych prac; pełni też funkcje edukacyjne, kształtują poczucie obowiązku i odpowiedzialności, uczy cierpliwości, jest źródłem radości z efektywnej pracy;

- **silvoterapia** (z łac. silva -las) – terapia oparta na kontakcie z drzewami, lasem, doświadczeniu bliskości drzewa, jego faktury, odgłosów; jest szczególnie wskazana dla dzieci biernych i statycznych, daje możliwość rozwoju zainteresowań, uspokaja, inspirowa do innych aktywności np. twórczej;

2

## FROM POLOEUROPA:

Questo modello descrive il processo di riabilitazione e lo studio di un caso da utilizzare nella formazione pratica (formazione sul lavoro) nel campo della "riabilitazione attraverso la natura per le persone con disabilità mentale", secondo il piano di lavoro YAŞAD ...

Il modello riabilitativo proposto nel nostro progetto sarà attuato in base allo studio di un caso: il piano di lavoro è sviluppato di seguito nei particolari.

**L'attuazione del modello di riabilitazione**

Il contributo delle famiglie e dei centri di riabilitazione, così come quello delle organizzazioni non governative è molto importante per lo sviluppo e l'attuazione del modello.

Di seguito viene spiegato lo studio di un caso.

Ahmet è disabile dalla nascita ed è stato diagnosticato come affetto da ritardo mentale. Fino a otto anni, ha vissuto in casa con la madre, il padre e il fratello ed è rimasto lontano dall'ambiente sociale. In seguito, secondo le nuove disposizioni di legge e su consiglio dell'ambiente sociale, la famiglia di Ahmet lo ha iscritto al centro di riabilitazione speciale. Ahmet è rimasto in questo centro di riabilitazione per 5 anni. Attraverso le lezioni quotidiane di educazione speciale, si è registrato un miglioramento della capacità di movimento indipendente ed è emerso il suo interesse per la musica. E 'diventato un ragazzo più estroverso, che cerca di parlare e di esprimersi.

Tuttavia, nonostante voglia comunicare di più con l'ambiente sociale e con le persone, questa volontà è ostacolata dalla famiglia e dall'istituzione di riabilitazione.

Questo rende Ahmet aggressivo e nervoso: a questo punto, vi è un blocco nel processo di riabilitazione di Ahmet rispetto alla situazione socio-psicologica spiegata sopra. Ahmet, all'età di 14, entra nel periodo dell'adolescenza e il processo di riabilitazione che riceve non è sufficiente per migliorare.

Ora è necessario che si rilassi psicologicamente, che possa calmarsi e ricevere amore. Vuole conoscere il mondo che vede durante il viaggio in autobus, da casa al centro di riabilitazione.

La comunicazione è limitata a saluti come "ciao, arrivederci, come stai" e l'ambiente casalingo e la riabilitazione non sono più sufficiente per lui. Proprio a questo punto, il contatto con la natura ed il paesaggio e l'interazione con gli animali, i fiori, i fiumi, le piante, gli alberi contribuiscono ad accelerare il processo di riabilitazione e lo sviluppo psicosociale di Ahmet.

**Esempio di programma giornaliero del progetto di riabilitazione della natura e del paesaggio.**

Questo non è un tradizionale programma da svolgere in un'aula o in un laboratorio, ma si tratta di un progetto che tenta di cambiare l'atteggiamento delle persone a contatto con le fasi cicliche della natura ed il paesaggio. Questo programma è preparato con un'ottica professionale ed è osservabile e misurabile. In ogni fase del programma, i ragazzi saranno inseriti in base alle loro capacità; l'attuazione del progetto sarà supportata da operatori sociali che si avvarranno di tecniche e metodi di insegnamento.

Questo programma, istituito per i bambini con disabilità mentali, viene applicato a gruppi che vengono suddivisi in base alla loro età e al livello socio-psicologico.

Poster or Roll-up, banner.

The project poster was designed as an impacting dissemination tool, in English. All partners was used it for promoting the Love Power of Nature idea and especially for the conferences, workshops and events. Partners could also prepare their own design of roll-up or banner if they are need it to promote our project. Poster has been prepared to make the project more visible for the audience of those conferences where LPN presentations are made or just poster session planned.

The roll-up was produced for the events. Roll up has a shape of rectangle size 100 cm x 200 cm. The roll-up was consist of project's logo, all EU demanded logos, logos and flags of every partner's country. In the middle it is a short description of the project and short description of the project's result. The background of the roll-up was chosen during the Kick-off meeting in Turkey by all partners.

There was also banner which was promote the events in Turkey. Turkey banner was hanged and there was written the title of the project with all logos and names of partners of project consortium.

Below are examples of posters and roll-up and banner from Turkey, Romania, Italy, Portugal and Poland.

POSTER FROM ITALY - Polo Europeo

## Love Power of Nature

Il progetto Love Power of Nature, La forza dell'amore della Natura, LPN è un Programma Riabilitativo Nella Natura ed ha lo scopo di far acquisire fiducia in se stessi ai portatori di handicap attraverso l'acquisizione di competenze di vita indipendenti, come l'alimentazione e la cura di specie animali in ambienti naturali, le attività agricole e la creazione di consapevolezza nelle famiglie.

### Partners

**Project presentation template**

The layout of ppt has been prepared in English. Partners presenting the information on national conferences are responsible for translation. As information presented on conferences, meetings, events sometimes had to be changed to serve the events purpose those with significant changes prepared by the partners were made available on the LPN website for internal use for all LPN members. A PowerPoint presentation was also used on projects meetings. Each partner has to prepare his own presentation on project power point template.

Below are examples of ppt slides who was used on meetings.

## Articles

Every partner was send article about the project in the national language to the branch newspapers and/or branch websites. The article was relevant to the topic of the project and always should refer to the LPN project. There should be at least 2 articles per partner per year of project lifetime (total 4 articles/partner for project lifetime).

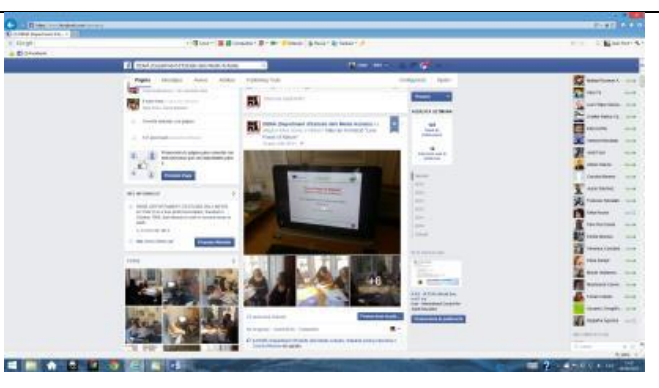

Every partner was send short information or press release about Love Power of Nature project to the regional or national newspapers or in agricultural journals or in TV, Radio. Every partner developed message about project in regional or nation mass media or in social media like: facebook, twitter, linkedin etc..

Most of partners was send article about the project in the national language to the branch newspapers and/or branch websites.

## Press Conference

On 10 April 2015 was held conference inaugurating the start of the project "Love Power of Nature". The conference appeared to be very numerous representatives of local authorities and representatives of the press and television. The result of this meeting were numerous in press releases in the local newspapers and on the Internet. The conference presented the project's aims and target groups. Each of the partners involved in the project was invited to present its activities and its institutions.

Conference - At 27.02.2016 in Karniowice took place regional agricultural conference. There were around 300 participants from Małopolska region. ARID Laczum actively disseminated LPN project during this event by presenting roll-up, spreading leaflets and executing presentation in front of all those participants. There were many interested stakeholders who asked about the projects aims and objectives. The conference appeared to be very numerous representatives of local authorities and representatives of the local press (300 peoples). After conference one of newspaper was write article about LPN project.

## Letterhead

A template was produced to give LPN partners possibilities to use official headed paper in communication with stakeholders. It was also a good template for layout as a agenda, for letters, for minutes or even for making a reports.

I

## PROMOTION TOOLS

### EXAMPLE FROM DEMA:

El proper dilluns **22 de juny de 2015, entre les 10:30 hores del matí i les 14 hores**, farem un Taller de Formació per presentar el mòdul de rehabilitació per persones amb deficiències mentals del projecte europeu **“Love Power of Nature”** del programa Erasmus +. Més informació a: <http://lpn-project.eu>

Ens agradaria comptar amb la vostra participació.

El Taller es farà a les nostres oficines del carrer Trafalgar, 25 2n 2a de Barcelona.

Per favor, confirmeu la vostra assistència abans del 15 de juny a la nostra adreça de correu: [projectes@dema.cat](mailto:projectes@dema.cat) o al telèfon 931248004.

Gràcies pel vostre interès.  
Salutacions de l'equip de DEMA

Invitation to Training workshop; distributed by e-mail list at 26 institutions

EXAMPLE FROM YASAD:

The image shows a flyer for a training workshop. At the top, there are logos for the Ministry of EU Affairs of the Republic of Turkey, the Love Power of Nature project, the YASAD (Yapay Akademi Kurumu ve Yaratma Derneği) organization, and the Turkish National Agency. The central text reads "DOĞANIN SEVGİ GÜCÜ" in large blue letters and "Love Power of Nature" in large red letters. Below this, there are logos for Altieylül Belediyesi, GMKA (Göney Marmara Kalkınma Ajansı), GeoClub, ACTA Center, Polo Europeo della Conoscenza, LACJUM (Stowarzyszenie Rozwoju Inicjatyw Regionalnych), and DE MA (departament d'estudis dels mitjans actuals). On the right side, there is a logo for Balıkesir University (1992) and a logo for the Ministry of National Education.

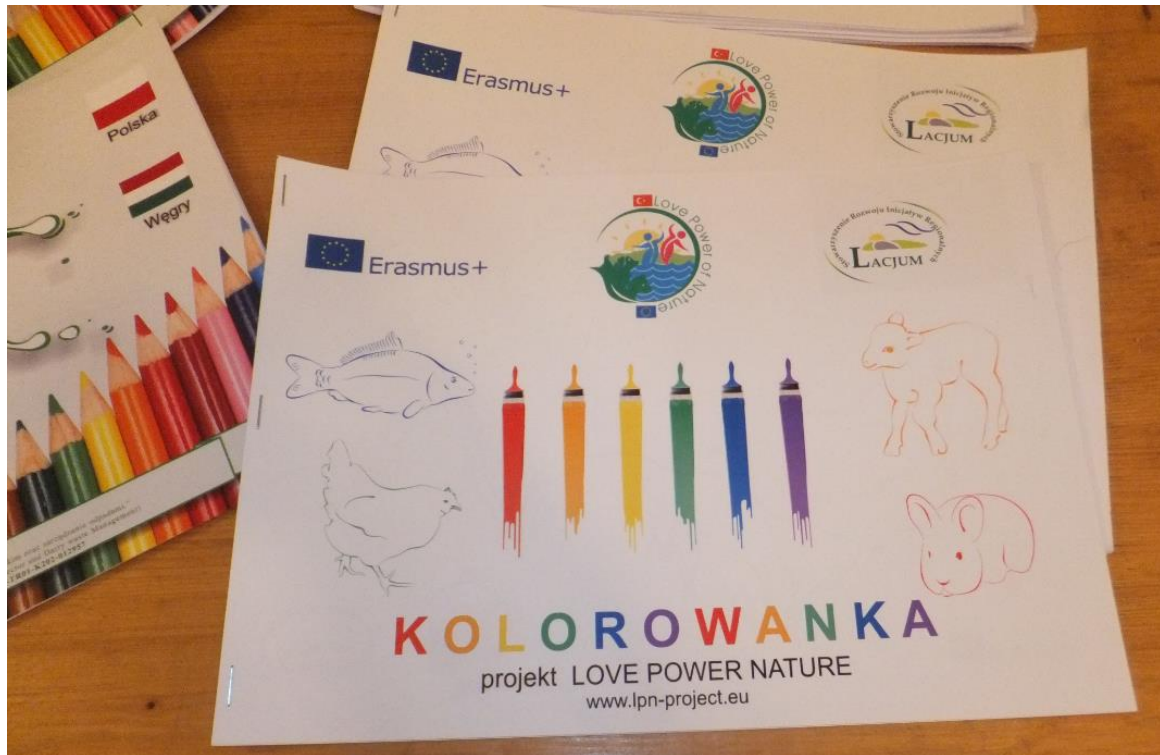

Invitation to training workshop.

EXAMPLE FROM ACTA CENTER:

The image shows a flyer for a training workshop. At the top, there are logos for Erasmus+ and anpcdefp. The text in the center reads "Centrul European pentru Integrare Socioprofesională ACTA", "ORADEA, ROMANIA", and "“Rehabilitation of the disabled person in nature and natural environments”". Below this, it says "Curs de formare, 2 – 4 Iunie 2015". There are logos for Turkey, Romania, Italy, Spain, and Portugal. At the bottom, there are logos for ACTA Center, Love Power of Nature, and Erasmus+.

Invitation to training workshop

Color book for children created by ARID Lacjum and spread in to meetings, fairs and exhibitions in all Poland.

Calendar for 2016 created by ARID Lacjum and spread in to meetings, fairs and exhibitions in all Poland.

## Book Calendar 2016 (ARID Lacjum)

"w sektorze mleczarskim oraz zarządzanie odpadami."  
Projekt w ramach programu ERASMUS +  
[www.wheyeurope.eu](http://www.wheyeurope.eu)

Projekt WHY WHEY adresowany jest do osób związanych z przetwórstwem mleka zarówno w skali mikro jak i makro. Projekt obejmował będzie konkretne studia przypadków i problemów w zakresie zarządzania odpadami pochodzącymi z produkcji nabiału. Celem projektu jest stworzenie materiałów szkoleniowych dla odbiorców z krajów Unii Europejskiej jak i krajów trzecich. Materiały przeznaczone będą dla profesjonalistów z branży mleczarskiej jak i zainteresowanych instytucji i organizacji pozarządowych działających w tym zakresie.

Dostosowanie umiejętności technicznych i zarządzania udostępnionych przez partnerów konsorcjum może również stanowić wartość dodaną dla poprawy efektywności pracy przedsiębiorców wobec tak zwanych „zielonych miejsc pracy” powstałych w wyniku włączenia zasady zrównoważonego rozwoju w procesy modernizacyjne i dostosowanie do tej filozofii pracowników w wieku poprodukcyjnym doświadczonych pracowników.

Włączenie do współpracy wszystkich głównych podmiotów w sektorze gospodarki odpadami mlecznymi (firmy, uniwersytety, władze szczebla lokalnego i krajowego, publiczne instytucje pozarządowe, zainteresowane strony) pozwoli określić ogólne potrzeby szkoleniowe dotyczące przetwórstwa mleczarskiego w szczególności serwatki, która jest głównym tematem prezentowanego projektu.

Grupami docelowymi projektu są: pracownicy publicznych i prywatnych firm odpowiedzialni za procedury zarządzania odpadami (TR), zainteresowane strony (pracownicy sektora serowarskiego, pracownicy - specjaliści ochrony środowiska, organizacje pozarządowe, rolnicy), osoby zainteresowane racjonalnym i zrównoważonym zarządzaniem odpadami (IT), studenci szkół wyższych i pracownicy instytucji publicznych odpowiedzialnych za ochronę wód i zdrowia publicznego (TR), rolnicy i władze lokalne odpowiedzialne za zrównoważony rozwój obszarów wiejskich (HU, PL).

LOVE POWER of NATURE  
Projekt w ramach programu ERASMUS +  
[www.lpn-project.eu](http://www.lpn-project.eu)

Stworzenie innowacyjnych metod i materiałów szkoleniowych (interaktywna platforma e-learningowa, podręcznik) z zakresu edukacji dzieci i młodzieży z dysfunkcjami umysłowymi poprzez wykorzystanie natury jako środowiska terapeutycznego

Przeniesienie doświadczeń i programów nauczania poprzez naturę z Turcji do innych krajów europejskich.

Partnerami projektu są instytucje z Turcji, Portugalii, Hiszpanii, Rumunii, Włoch i Polski.

Projekt rozpoczął się 1.09.2014 i będzie trwał 24 miesiące.

Stowarzyszenie „Lacjum” jest organizacją pozarządową typu non-profit. Powstało w 2009 roku. Celem Stowarzyszenia jest działalność na rzecz rozwoju regionów.

Celem Stowarzyszenia jest przede wszystkim prowadzenie różnorodnych form kształcenia oraz doskonalenia zawodowego a także wydawanie i rozpowszechnianie materiałów o charakterze szkoleniowym, informacyjnym oraz publicystycznym.

Swoje cele Stowarzyszenie realizuje poprzez realizację różnorodnych projektów międzynarodowych skierowanych do różnych grup zawodowych. Do tej pory Stowarzyszenie wzięło udział w 4 dużych projektach międzynarodowych w ramach programu Leonardo da Vinci oraz Grundtvig. Projekty te były realizowane w konsorcjach międzynarodowych składających się z przedstawicieli państw europejskich takich jak: Polska, Hiszpania, Rumunia, Bułgaria, Turcja, Węgry, Włochy, Belgia, Holandia, Malta, Cypr, Islandia i Litwa. Efektem tej współpracy są materiały szkoleniowe wydane w formie podręcznika oraz w wersji elektronicznej dostępnej na stronach internetowych poszczególnych projektów. Po więcej szczegółów zapraszamy na naszą stronę internetową [www.arid.org.pl](http://www.arid.org.pl).

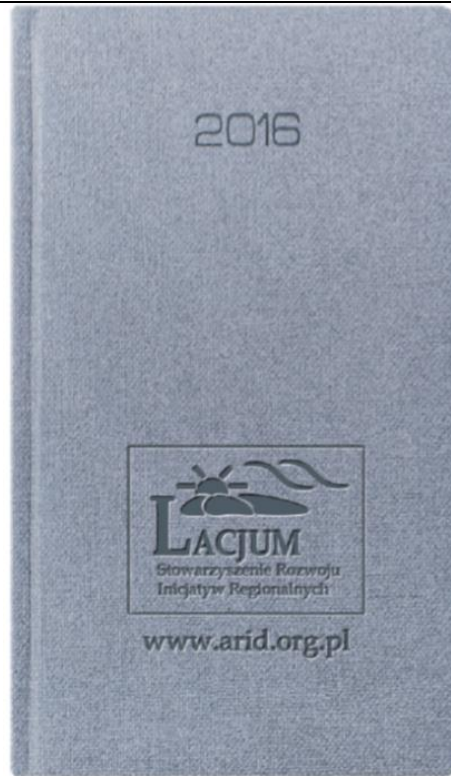

W chwili obecnej Stowarzyszenie realizuje w partnerstwach międzynarodowych jeden projekt w ramach programu Leonardo da Vinci oraz 4 projekty w ramach nowego programu Unii Europejskiej ERASMUS +. Projekty te dotyczą różnych sfer doskonalenia zawodowego m.in. w rolnictwie i zawodach związanych z rolnictwem. Projekty realizowane są w partnerstwie z takimi krajami jak: Turcja, Węgry, Rumunia, Hiszpania, Włochy oraz Portugalia.

Zainteresowane działalności Stowarzyszenia osoby zapraszamy do odwiedzenia naszej strony internetowej [www.arid.org.pl](http://www.arid.org.pl) oraz do kontaktu poprzez formularz kontaktowy na stronie.

AGRI-YOUTH - „Profesjonalny podręcznik dla młodych rolników”  
[www.agri-youth.eu](http://www.agri-youth.eu)

Obszary wiejskie zajmują ponad 85% powierzchni państw członkowskich Unii Europejskiej. Większość ludności skupia się w dużych miastach. Obecny kryzys gospodarczy i finansowy zagraża zatrudnieniu w Unii Europejskiej. Obszary wiejskie mogą zaoferować alternatywę dla zrównoważonej działalności i tworzenia nowych miejsc pracy. Szczególnie dla młodzieży oraz kobiet obszary wiejskie mogą stać się alternatywnym miejscem zamieszkania i pracy.

Street baner: ARID Lacjum has made a street light banner 2 times, on main street in small town near to the rural area.

**Communication**

Special emphasis was put on good communications throughout the project. Project meetings where partners meet and discuss in detail was of critical importance.

### **Meetings plan:**

- First project meeting was in Turkey/Balakisir - DONE
- Second project meeting to take place in Italy/Werona, - DONE
- Third meeting takes place in Portugal/Porto, - DONE
- Fourth meeting takes place in Spain/Barcelona, DONE

### **Conclusions**

This Dissemination Report provides the complete overview of the dissemination activities implemented

in the scope of the Love Power of Nature project, in accordance with the provisions of the Dissemination Plan issued at the beginning of the project.

The effectiveness of dissemination activities has been ensured by defining appropriate target groups, allowing the most relevant audience to be reached with the most appropriate dissemination tools. The main aim has been to keep them constantly updated about project findings and most relevant results. The dissemination tools developed during project lifetime included:

- a public website realized at the beginning of the project and regularly updated to disseminate the most recent news and provide information concerning the project results and activities;
- the Love Power of Nature Group at twitter or facebook members all over the world, which hosts related .
- project newsletters to provide information and results on the project to be distributed during public events;
- specific dissemination tools used and distributed at external conferences (i.e. leaflets, a one slide presentation and a poster/roll-up or banner)

Furthermore, members of LPN target groups have been invited to attend the various workshops as a mean to provide with more detailed information concerning LPN activities and results.

Likewise, the communication tools were very adequate, basing on the partnership's satisfaction degree: the website was assessed as friendly and easy to navigate in.

Project partners was used of new tools of dissemination like: social portals for example: Facebook account etc., it has proved to be a good dissemination tool addressing to concrete stakeholders profile. It was useful for interchanging project progress, methodology and peer experiences among entities participating in other partner's project, allowing external synergies.

Dissemination activities have fitted the target groups and end-users characteristics, and national or regional particularities have been taken into account, including peculiarities.
